1. Preface

International conference "Advanced Problems of Electrotechnology APET-2020" was held October 1-2, 2020 in the Ural Federal University named after the first President of Russia B.N.Yeltsin.

This conference presents papers that largely reflect problems that scientists and specialists in the field of modern electrotechnology solve, as well as in related fields of technology. This applies, first of all, to electrothermal equipment, magnetohydrodynamics and electrotechnologies, power supplies and power supply systems of this equipment.

Conference was held with the support of the Department «Electrical engineering» of the Ural Power Engineering Institute.
